

FOUNDER'S REPORT

2021

I don't think anything prepared me for this year. What an incredible year!

From raising money for TAPS research, to raising awareness of our rare disease, and establishing ourselves as a presence to be reckoned with when it comes to talking about TAPS - I think we had an amazing year.

This year has taught me many things about myself, and reinforced to me that this is not only my passion, but that of some amazing people around me.

The entire foundation team is to thank for our success - you don't realise how much your support, your energy and your enthusiasm mean to me. You also don't realise how much your grounding energies, and being the voices of reason behind my hairbrained idea has meant to me. Thank you for being amazing, all of you.

In 2022, we are going to be louder, stronger, and focussed on raising awareness and changing the future of twins - and I can't wait to for everyone to be part of this.

This is the year of TAPS. Let's make positive changes together as a team.
